PROJECT NAME
Mulberry Street Circulation Improvements Project

PROJECT OWNER
City of Newark

- SERVICES PROVIDED
- Landscape Architectural design
 - Pavement design
 - Coordinate with those doing drainage, utility design, lighting, traffic signals, maintenance and protection of traffic, and signing and striping
 - Respond to reviewing agency comments and construction questions

PROJECT DESCRIPTION

Carroll Gordon was the Landscape Architect responsible for development of system-wide landscape plans, signage, and site design for visual impact assessment, landscape design and the preparation of final construction documents for the widening of approximately one mile of Mulberry Street. She has also developed construction documents for the improvements along Edison Place, located between Mulberry Street and Route 21 in downtown Newark.
