PROJECT NAME

Construction Engineering and Inspection Services for the 2007 Roadway Resurfacing and Incidental Improvements Program – Essex County, NJ

PROJECT OWNER

Essex County, Department of Public Works, Division of Engineering

PROJECT DESCRIPTION

KS Engineers, P.C. has been retained by the Essex County Department of Public Works to provide construction inspection services for the 2007 Roadway Resurfacing and Roadway Improvement Program (RRRIIP). The project include approximately 5.22 miles of resurfacing of the following county roads.

<u>Road / Facility</u>	<u>Municipality</u>	<u>Limits</u>	<u>L.F.</u>
Laurel Avenue	Livingston	Route 280 to Mt. Pleasant Av.	5,700
Scotland Road	South Orange	So. Orange Av. To Randolph Pl.	4,610
Grove Ave.	Ceder Grove / Verora	Bloomfield Av to Route 23	9,940
Grandview Ave.	North Caldwell	Sunset Dr. to Fairfield Rd.	2,850
Mountain Ave.	North Caldwell	Gould Ave. to Hickory Dr.	4,450

RRRIIP is a construction contract that provides the removal and replacement of existing pavement on Essex County roadways. The work involved includes but not limited to the missing, overlay, pavement markings, drainage improvements, installation of guide rails and other incidental improvements. Specifically, the services include but not limited to the following:

- Providing full time resident engineering and inspection services
- Conducting utility pre-construction meeting and act as county liaison
- Maintain daily reports and submit to County Engineer on a timely basis
- Prepare and recommend construction change orders and supplemental agreements
- Report directly to the county engineer
- Monitor the Contractor compliance with local, state and federal regulations
- Monitor Contractors compliance to MBE / WBE participations
- Review and recommend partial payments
- Provide bidding assistance to the County
