Rehabilitation of the Newark Schools Stadium

Newark, NJ

PROJECT NAME

Rehabilitation of the Newark Schools Stadium, Newark, NJ

PROJECT OWNER

Newark Public Schools, Newark, NJ

PROJECT DESCRIPTION

The Newark Schools Stadium, located on Bloomfield Avenue, Newark, is a reinforced concrete horseshoe-shaped stadium structure that contains a large amount of deterioration and compromised structural integrity.

The rehabilitation project will include Programming, Planning, preparation of Design and Construction Contract Documents, and Construction Administration Services for the Renovation/Rehabilitation and/or reconstruction of the stadium. The scope of work includes three distinct phases – Project Feasibility and Site Evaluation phase, Design Document Phase and Construction Contract Administration phase.

KS Engineers, PC was retained as a sub-consultant to provide the following services for this rehabilitation project:

- Complete Site/Civil Engineering
- Traffic Engineering
- Geotechnical Engineering
